## Additional Skills

---

- PHP, Laravel, SQL, MySQL
- Vue, Vuex, JavaScript, API
- TailwindCSS, CSS, HTML, Bootstrap
- Linux, Git, Docker, Postman, Redis

## Professional Summary

---

My main interest is web development, both on the front end and back end, where I hone my skills in creating web applications. I specialize in the LEMP and LAMP stack (PHP), with a focus on the Laravel framework and the ecosystem surrounding it.

My experience lies in crafting user-friendly and easily navigable interfaces. Additionally, I have a strong grasp of databases, API integration, and implementing features tailored to client needs. My goal is to stay up-to-date with web development trends and continually improve my skills.

Throughout my career, I have actively worked on developing small projects, which has allowed me to gain practical experience in web development. While these projects may not have had commercial objectives, they were crucial for my personal and professional growth.

I am ready to invest myself in work and do everything possible to achieve the desired results in the field of PHP and Laravel development. I want to apply my skills and knowledge to real projects. My primary goal remains to create high-quality websites and APIs that meet the requirements of each client, and I am prepared to contribute to achieving this goal.
